

KABATA

Knik Arm Bridge and Toll Authority

KNIK ARM CROSSING PROJECT

Alaska Department of Transportation & Public Facilities

DOT&PF

Mark your calendar... Knik Arm Crossing public scoping meeting!

You are invited! Two public scoping meetings, identical in content and format, are scheduled to give you an opportunity to learn about the project, ask questions, and give us your comments. The scoping meeting format will include an open house and presentation, followed by an opportunity to ask questions and express your thoughts about the project.

At the public scoping meetings, you can:

- Meet team members from the Federal Highway Administration, and the Knik Arm Bridge and Toll Authority
- Talk with the biologists, planners, economists, engineers, and others working on the project
- Visit stations where you can learn about different aspects of the project and the NEPA process
- Find out the results of preliminary studies and surveys
- Learn about opportunities and limitations for locating the project, such as shipping channels, physical features of Knik Arm, military airspace and security restrictions, and environmental and community constraints
- View preliminary corridor concepts that have been identified to date
- Be a part of the process!
